NEW DELHI 3 (INDIA);

The 6th November, 1950

S. P. JAIN,

for Registrar General, India:

NATIONAL SAVINGS

CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, $3\frac{1}{2}$ % and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in then inclusive of any Post Office cash ertificates held).

Full particulars obtainable from all post offices, District Organisers of the Smain-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simia.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 14th October, 1950

^{*} In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

[†] Figures not available.

Explanation of symbols used :— D.=Firths; B.R.=Birth rate; C.=Cholers; S.=Smallpox; P.=Plague; %=Fevers D.D.=Dysentery & Durrhun; R.I.=Respiratory diseases; M.D.=Maternal deaths; D.R.=Death rate; I.D.=Infantile Deaths (included in total deaths).

RHMARKS

The figures of births and deaths shown in this statement r the week ending the 14th October, 1950, relate to 125 was with an estimated population of 13,713 thousands. he total number of towns is 233 and their population is 1,421 thousands. Thus 51% of the total number of towns presenting 48% of the total population is covered in this tatement. The numbers of births and deaths recorded in e towns were 11,792 and 5,232 representing birth and ath rates of 44.7 and 19.8 per thousand of population espectively.

(A) States (Parts A & C).—The data here relate to 101 owns with an estimated population of 11,187 thousands. nformation about Assam, Bihar, Bombay, Madhya Pradesh Irissa and West Bengal could not be included. The total number of towns is 201 and their population is 24,668 thousands. Thus 50% of the total number of towns representing 1% of the total population is covered. The numbers of

births and deaths recorded in these towns were 10,121 and 4,625 representing birth and death rates of 47.0 and 21.5 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(B) States (Part B).—The data here relate to 24 towns with an estimated population of 2,526 thousands. The total number of towns is 32 and their population is 3,753 thousands. Thus 75% of the total number of towns representing 67% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,671 and 607 representing birth and death rates of 34.4 and 12.5 per thousand of population respectively.

No town recorded a high death rate of 50 or over pur thousand of population.
